Training

NLTG
NORTH LANCs TRAINING GROUP

Which Route

Young people must stay in education or training until they are 18

This can be

- Full-time education (sixth form college, school sixth form, further education college, University Technical College)
- An Apprenticeship or Traineeship
- Part-time education or training combined with one of the following:
 - employment or self-employment for 20 hours or more a week
 - volunteering for 20 hours or more a week

A levels

- A' levels are academic courses that are studied over 2 years. Students usually study 3 full A' level subjects, although some students may study 4 subjects
- Assessment is mainly focussed on examinations, with exams now taking place at the end of the 2nd year of study
- By studying 3 (or in some cases 4) separate subjects, options for the future can be kept open. However, certain progression routes at university or for apprenticeships may require or prefer specific subjects to be studied at A' level. Careers advice and guidance can be beneficial when choosing subject combinations
- Entry requirements vary depending on the college, but students will generally need at least 5 x grade 4's in their GCSE's (usually including English and maths) to start a programme of A' levels. Colleges may ask for higher grades in some subjects in order to study them at A' level. For example, you will often need at least a 6 in mathematics and/or relevant Sciences to take these subjects at A level
- Students use A' levels to gain entry to university courses, all levels of apprenticeships or to apply for work/training

Vocational

- Courses are usually linked to specific or broad career areas and last 1 or 2 years dependant on the level studied
- Students can study at either level 1, 2 or 3 depending on their GCSE grades
- Most vocational courses offer practical experience which may include work placements
- Assessment is mainly focussed on coursework and practical projects
- Entry requirements vary due to the variety of course levels available. As a general guide, the minimum entry criteria for the different levels are:
 - Level 3 courses = 4/5 x grade 4's in GCSE's (often including English and/or maths)
 - Level 2 courses = 4 x grade 3's in GCSE's
 - Level 1 = 4 x grade 2's in GCSE's
- Generally more suited to those who have some idea about their future career direction, although it may be possible to change direction if you decide the course is not for you. Some courses are relatively broad (e.g. Business Studies) whereas others are very specific (e.g. Hairdressing). It is beneficial to seek advice and guidance before choosing a course
- If your teenager does not have the qualification needed to go onto a Level 1 course, there are pre-entry level courses available.
- Students who successfully complete lower level courses can progress onto higher level college courses or opportunities such as Supported Internships, Traineeships or Apprenticeships.
- Students who successfully complete a suitable level 3 course (e.g. BTEC Level 3 Extended Diploma) may be able to progress onto a **Higher Technical Qualification at Level 4/5**, university or an Advanced/Higher Apprenticeship.

T Levels

- A new type of qualification called T Levels started to be rolled out in Sept 2020 which is equivalent to 3 A Levels. These 2 year courses will offer students a mixture of classroom learning and 'on-the-job' experience. By September 2024 there will be 23 T Levels available.
- T Level courses include the following compulsory elements:
 - a technical qualification, which includes:
 - core theory, concepts and skills for an industry area
 - specialist skills and knowledge for an occupation or career
 - an industry placement with an employer of at least 315 hours (45 days)
 - a minimum standard in maths and English if students have not already achieved them
- Students who complete their T Level will receive an overall grade of pass, merit, distinction or distinction*. They will get a nationally recognised certificate which will show their overall grade and a breakdown of what they have achieved.
- T Levels provide several progression options to students which include skilled employment, an apprenticeship and higher education. To help T Level students get into higher education, UCAS tariff points will be allocated to T Levels. UCAS points will only be allocated to the overall T Level grade. Students must achieve at least an overall pass grade to receive UCAS points.
More information at www.tlevels.gov.uk

Apprenticeships

- Apprenticeships are jobs with training leading to nationally recognised qualifications in a specific trade or skill. They can be accessed after school or after college level study
- Apprenticeships are offered at different levels and vary in the length of time taken to complete; an Intermediate Level 2 Apprenticeship usually takes around 12 to 18 months, an Advanced Level 3 Apprenticeship around 24 months and a Higher Level Apprenticeship can last up to be 5 years. Degree Level Apprenticeships are now increasingly an option for some career pathways
- An Apprenticeship may include time away from the workplace to do some training at a college or training centre, but most training and assessment is done on the job
- Earn while you learn! Apprentices are paid a minimum of £5.28 per hour however many apprentices earn significantly more, with the average apprenticeship wage standing at over £200 per week if not higher.
- There are a wide range of apprenticeships available. Around Greater Manchester the greatest numbers of vacancies are in business administration, customer service, financial services, digital industries, retail and childcare. Apprenticeship vacancies also include design, hospitality, construction, vehicle industries, surveying, engineering, teaching assistant, dental nursing, estate agency and paralegal roles
- After completing an Intermediate Level Apprenticeship, young people can continue with their education or training through a Higher, Advanced or Degree Level Apprenticeship (which are currently being delivered by universities such as Manchester Metropolitan University & University of Salford) or continue onto a related vocational qualification. Alternatively, some young people may go on to a college or university level course, or take a professional qualification that may lead to a specific job role
- Apprenticeships give valuable industry experience which is an advantage when looking at progressing in a career

Traineeships

PARENTS POST 16 GUIDE

- Traineeships can be used as a stepping-stone to an Apprenticeship. If your teenager is motivated to get an Apprenticeship but lacks either the experience or the skills that employers are looking for, then Traineeships can help.
- Traineeships are an opportunity to gain real work experience, job skills and improve their English and maths, if needed.
- The programme can last up to a maximum of six months but many are around three months with the content tailored to their individual career needs.
- Although Traineeships are unpaid, they will build up the young person's confidence and skills and help them to find an Apprenticeship or a job with training.
- Traineeships are advertised regularly at www.gov.uk/find-traineeship

Employment with part-time training or college

- If your son or daughter is interested in getting a job, remember that they won't be allowed to start full-time work until after the official school leaving date. This is the last Friday in June, in the school year in which they reach 16.
- If your teenager leaves school at 16 and hasn't got an offer of a place at college or employment they should go into the Connexions Centre and advisers are there to help them. Connexions Bury is based at 3 Knowsley Place, Duke Street, Bury, BL9 0EJ.
- There is a new government job matching service called Find a job which enables a search on job vacancies and it can be narrowed down by job type or skills and locality.
<https://www.gov.uk/jobsearch>.

How to Apply - Tips

Apprenticeship or Traineeship

- Go to the National Apprenticeship Service (NAS) website to search for information, opportunities and vacancies. www.apprenticeships.gov.uk is the National Apprenticeship Service website that details everything you need to know about apprenticeships and traineeships including a vacancy matching service which you can get to directly at: <https://www.gov.uk/apply-apprenticeship> or at www.gov.uk/find-traineeship
- Contact a training provider directly and see vacancies on individual provider websites
- Attend open days and events run by training providers.
- Talk to the Careers Advisers in school about where and how to apply for vacancies.
- Look on the Greater Jobs website to find jobs and apprenticeships within Greater Manchester Councils, GM Fire & Rescue and public sector.
- Employers take on apprentices throughout the year; there is no set start or application date. Many of the vacancies advertised from Easter onwards have start dates suitable for school and college leavers. Some larger companies advertise from January each year with summer or September start dates.

A level/Vocational

- College courses can be applied for directly online or by using a paper application form.
- All local college have course information online and in prospectus brochures.
- Attend college open events. Many colleges have open days and events throughout the year, particularly in September and October to help prospective students and parents and carers. Details for open days can be found on college websites. Local colleges include Bury College, Holy Cross, The Manchester College, Bolton College, Hopwood Hall College and Salford College but there are more.
- Individual colleges have varying closing dates; ensure you know when these are, the earliest being mid-November.
- Get advice and guidance to ensure you course choices match your career ideas.

Four steps to helping your teenager make career plans

1. Getting beyond the barriers

With so many different careers and routes to choose from, how is your teenager going to decide what will suit them best? Career planning is an organised way of thinking about the options. You can help your teenager with this process, as you probably know them better than anyone! You can help them to think about:

Ask

- **What do you want to do – have you a career in mind?**
- **What do you care about?**
- **What do you like to do with your time?**
- **What type of person are you? Are they well-organised, creative, sociable, technical?**
- **What do you enjoy doing?**
- **What are you good at?**

If they can follow a career based on their passion or interest (or even an obsession!) this can be an unstoppable force.

2. Find basic information

- The National Careers Service has a wide range of job profiles on their website where you can find out useful, relevant and up-to-date information. Look on <https://nationalcareers.service.gov.uk> or type 'job profiles' into a search engine.
- Specialist careers websites can also help your teenager to plan their future. Specialist careers websites like Kudos and E-CLIPS may be available for your son or daughter to access online at their school and home. These can help your teenager to find out more about which careers might suit them and get factsheets about hundreds of different jobs.
- There should be careers information in school often in the school library or in a careers room or resource area. Your teenager should ask the careers teacher. They will also signpost them to good websites.
- Have they checked what skills and qualifications they would need to get into the job/career area they are considering? Have they thought about what the work would be like, the average salary they could expect and what the career prospects are? What do they know about the different routes – A' levels, vocational and apprenticeships? Which ones suit their learning style? Do their career ideas require a certain route or is there a choice of routes?
- Encourage them to complete research by visiting college and training provider open events, reading through prospectuses, looking on the National Apprenticeship Service website and talking to colleges and training providers if they come into school.
- There will also be a careers adviser and careers teacher in school who can offer information, advice and guidance, usually from Year 7 upwards. The school website should provide contact details.

3. Give Practical Help

- Help them fill in application forms accurately and neatly, including any relevant information that helps their application stand out from the crowd.
- If they are offered an interview, help them prepare by discussing the kind of questions they may be asked, how they should dress and behave and also any questions they could ask.
- If they have successfully been offered a college course or apprenticeship, find out whether there are conditions attached, such as GCSEs they need to pass.

Useful websites

- www.burycareersevent.org.uk – the website that supports this event, you will find further information on many of the exhibitors here.
- www.parentalguidance.org.uk - a website for parents supporting their children with career choices.
- www.preparingforadulthood.org.uk - careers advice and support for parents of young people with special educational needs.
- <https://nationalcareers.service.gov.uk>- online information on more than 130 industries with 800 different job profiles and a helpline available from 8am until 10pm, 7 days a week (0800 100 900).
- www.apprenticeships.gov.uk - the National Apprenticeship Service website that details everything you need to know about apprenticeships and traineeships including a vacancy matching service. Your child can register and search for ideal jobs based on postcode, job role or sector.
- www.ucas.com and <https://www.theuniguide.co.uk> – two comprehensive sources of information and advice about university and higher level education; offering information on how to choose courses, different types of study and entry requirements.
- <https://www.gov.uk/jobsearch> -search and apply for full or part-time jobs in Great Britain.
- www.greater.jobs - job vacancies in councils across Greater Manchester, Greater Manchester Fire and Rescue, Greater Manchester Police and other public sector organisations.
- www.jobs.nhs.uk - Perform a job search, find jobs that match your skills, and apply for NHS jobs
- <https://icould.com/> - careers videos and information about jobs.
- www.notgoingtouni.co.uk - a one stop site for apprenticeships, gap years, distance learning and jobs for students looking at alternative pathways
- www.theburymdirectory.co.uk/kb5/bury/directory/careleavers_localoffer.page - Bury Care Leaver Offer
- www.theburymdirectory.co.uk/kb5/bury/directory/localoffer.page - Bury SEND Offer
- www.theparentsguideto.co.uk – information for parents or teens aged 14-19 with information about options after GCSE or sixth form also how to improve mental health and help with studies
- <https://nationalcareers.service.gov.uk/explore-your-education-and-training-choices/higher-technical> - Higher Technical Qualifications are an alternative to Apprenticeships or degrees and can be studied full or part-time

PARENTS POST 16 GUIDE

Understanding the different levels and pathways

Level	Academic	Vocational (college based)	Vocational (job based)	Apprenticeships
Levels 4-6 (Higher)	Degrees	Higher National Diploma	Professional/ Management Qualification	Higher Apprenticeships
	Foundation degrees			Degree Apprenticeships
Level 3 (Advanced)	International Baccalaureate, AS & A2 levels A levels	BTEC Level 3 Nationals	Level 3 NVQs	Advanced Apprenticeship
	Entry = 5/6 GCSEs grade 4-5 minimum	Entry = 4 GCSEs grade 4-5 or Level 2 qualification T Levels	Entry = 4 GCSEs grade 4-5 or Level 2 qualification	Entry = 4 GCSEs grade 4-5 or Level 2 qualification + interview
Level 2 (Intermediate)	GCSEs grade 4-9	BTEC Level 2	Level 2 NVQs	Intermediate Apprenticeship
		Entry = generally 4 GCSEs level 3 and a school report or a Level 1 qualification	Entry = less than 4 GCSEs grade 4-5 or Level 1 qualification or assessment	Entry = GCSEs at grade 3 or above or Level 1 qualification + interview
Level 1 (Foundation)	GCSEs grades 1-3	BTEC Level 1	Level 1 NVQs	Traineeship
		Entry = interview or assessment	Entry = interview or assessment	
Entry Levels	Entry level certificates	Functional Skills or Entry Level (English, maths and ICT)	Awards, Certificates and Diplomas at Entry Level Supported Internship	Skills for Life

START YOUR JOURNEY TO A POSITIVE FUTURE

Bury College is proud to be an inclusive college which offers opportunities for everyone.

Wide range of courses

We have a fantastic range of A-level, T level, Vocational and Apprenticeship programmes to choose from.

Enrichment opportunities

There are plenty of opportunities to get involved in different activities, enrichment groups, and societies, all aimed at helping you to meet new people, learn new skills, and add value to your CV.

Excellent progression

613 students progressed onto university last year, and many more went straight into employment or an apprenticeship.

Experienced tutors

Our caring tutors will support you every step of the way. You will benefit from a wide range of support services including careers advice and guidance, financial support, counselling and wellbeing and additional learning support.

OPEN EVENTS 2023/2024

Visiting our open events is a great opportunity to tour our fantastic facilities, meet our dedicated tutors and explore your options.

2023

Tuesday 3rd October • 5.00 - 7.30pm
Thursday 12th October • 5.00 - 7.30pm
November (tbc) • 10.30am - 1.00pm

2024

Thursday 21st March • 5.00 - 7.30pm

Visit our website to book your place.

APPLICATION DEADLINE

The quickest way to apply to Bury College is online. For September entry 2024, the priority deadline is **Monday 27th November 2023**. Apply now and secure your place, visit: www.burycollege.ac.uk.

To support applicants on some of our popular courses including Construction Trades and Engineering, applications received by **Wednesday 1st November** will be given priority.

Part of the University of Bolton Group

Further Education at Bolton College

At Bolton College, we offer over 140 Study Programmes, T Levels and Apprenticeships, giving you the skills to progress to university or the job of your dreams. Our programmes start at Entry Level and progress up to Level 3 and beyond! Check out some of our high achievers!

Study Programmes

Joseph Dodd
Engineering Extended Diploma Level 3
Triple Distinction

'My tutor encouraged me to apply for a job at BAE Systems, the largest defence contractor in Europe, and I got the job! It's an amazing opportunity.'

T Levels

Chloe Ott
Digital T Level

'I've secured employment with Hewlett Packard as a software developer in Bristol.'

Apprenticeships

Katie Mulligan
Education & Childcare
Apprenticeship Level 3

'I progressed from my Apprenticeship and am now a nursery manager. I'm also completing a teaching qualification!'

Visit: www.boltoncollege.ac.uk

CHC

Sam Ellithorn

Attended *Woodhey High School* and then did BTEC Level 3 in Engineering at Bury College. After he finished his CHC work experience, he started a Higher Level Apprenticeship at Salford University on day-release, studying Civil Engineering, whilst working on CHC sites across the country.

James Benson

Attended *St Gabriel's High School* and is currently on a 2-year Groundworker Apprenticeship with CHC, studying at Salford City College on day release. He has also just gained his 360 Excavator licence.

Charlotte Benson

Attended *St Gabriel's High School* and did A levels in Business, Economics & PE at Holy Cross College. She is currently studying a Business & Management degree at Leeds Beckett and is on a year-long placement with CHC.

Toby Binstead

Studied A levels in Chemistry, Maths and Design Technology. Currently studying a Civil Engineering degree at Loughborough University and is on a year-long placement with CHC.

Elliot Soodeen

Studied A-level Geography, Physics and Biology. Then did his HNC in Construction at Salford University for one year. This gave him the option to further study either Project Management/Architecture/Building Surveying or Quantity Surveying. He chose Quantity Surveying, has recently graduated and is working for CHC as a Trainee Quantity Surveyor.

Joe Keane

Attended *St Monica's High School* and is currently on a 2-year Groundworker Apprenticeship with CHC, studying at Salford City College on day release. The other days he will be on sites all over the North West. Joe has just achieved his Forward Tipping Dumper and Ride on Roller plant tickets.

James Nuttall

Attended *Bury Grammar School* and then did a 2-year NVQ Level 3 Civil Engineering apprenticeship at Salford City College. Since joining CHC he has achieved his 360 Excavator ticket and has been working on a variety of CHC sites.

Trainee Plant Drivers

In 2022 so far, we have trained over 16 people who want to drive plant. That includes excavators, dozers and dump trucks.

Just some of the career pathways we can offer at CHC.

Who we are

Cheetham Hill Construction Ltd is a family-owned and run civil engineering and equipment hire company and was formed 50 years ago. Our principal business activities are wide-ranging, and include land reclamation, remediation and preparing sites for future development work.

We have also been involved in water and waste water treatment works, marine, roads and bridges, earthworks, infrastructure, water retaining and concrete structures, landfill developments, public realm and public art.

In addition, demolition, new build and refurbishment of industrial buildings, sites infrastructure, structural concrete bases and supporting structures, ground structures, ducting, earthworks, pipelines, sewers, road formation, retaining structures, pipe structures are also part of our portfolio.

DTE Business Advisers

- 5-year fully funded training programme with study support to gain your AAT and ACA qualifications through apprenticeships with our external training providers, open to school and college leavers from the age of 18.
- a 3-year fully funded training programme with study support to gain your ACA (Associate Chartered Accountant) qualification through an apprenticeship with our external training provider, open to graduates

The best of both worlds

Gain on-the-job experience whilst gaining not only the hard skills and knowledge of accounting and finances, but also the soft skills of working with clients.

Our size means you will be able to get involved in a variety of work. Our work-based training methods will ensure you develop into a well-rounded accountant with a knowledge and understanding of key financial matters affecting businesses in the UK.

Apply now: <https://www.dtegroup.com/vacancies-posts/graduate-trainee-accountant/>

About DTE Business Advisers

DTE's history dates back over 80 years and have a team of over 80 professionals. We pride ourselves on being the perfect-fit partner for SMEs, particularly owner-managed businesses, with industry-leading expertise and a personalised approach when working with clients.

As a leading national provider of business advisory services, we are committed to delivering an expert, professional and commercial service that drives the performance of our clients. We recognise that to achieve this goal, we need talented, skilled, ambitious people. We pride ourselves on building and nurturing an environment which allows our people to thrive and development themselves as they progress within the business.

The values we share

To realise the mission of being our clients' partner for success at every stage of their business journey, we are committed to 3 simple but strong values:

- Excelling in what we do
- Staying down-to-earth and focusing on what really matters
- Being dedicated and always having time for our clients

Holy Cross Sixth Form College & University Centre

Holy Cross College was founded to be a place where people would find support, understanding and friendship. Our welcome extends to all faiths and backgrounds. Whoever you are, whatever it is that makes you unique, we will value that uniqueness at Holy Cross.

Our students are the focus of all we do and are recognised as being *“courteous and respectful. As a result, a calm and harmonious atmosphere pervades the college.”* *“Students feel safe and are kept safe in the secure and caring environment created by leaders and managers.”* (Ofsted)

We specialise in Advanced Level study, currently offering 40 Level 3 courses, and have a long track record of nationally outstanding results. We value very highly our bespoke pastoral system and the enrichment opportunities we offer at Holy Cross which are extensive – sport, music, drama, charity work, D of E Award, subject based trips, field work and much more.

We invest heavily in supporting our students to develop their skills and interests beyond the classroom to fully reflect their talents. We offer excellent preparation for university or employment alike and invest a great deal in supporting students in moving on to the next stage of their chosen careers.

The University Centre offers a range of degree courses using a blended-learning platform. This approach has led to many students, who were not able to study in a more traditional way, to be highly successful in achieving their academic potential. From the point of initial enquiry, each student is allocated a dedicated support tutor providing guidance and support throughout their programme of study through to graduation.

University degrees are offered in collaboration with Liverpool Hope University and Edge Hill University. The entry requirements for courses are flexible depending on previous experience and qualifications. Many of the courses have competitive fees and a very high percentage of our students gain first class and 2:1 degrees.

Hopwood Hall

Hopwood Hall College and University Centre is a vocational college set across two unique campuses in Middleton and Rochdale. Just a stone's throw from Bury, it offers more courses than ever and boasts some of the most modern training facilities in the region.

The demand for courses is at an all-time high, which is why the college is introducing a brand-new free bus route that will serve Bury from September 2023. This will conveniently travel through Prestwich, Whitefield and Radcliffe to allow students complete ease when getting to the Middleton Campus.

This is in addition to the free bus that runs from Tottington, through Bury town centre and Heywood to the Middleton Campus.

Meanwhile, the Rochdale Campus is only a 5-minute walk from the town's bus station and Metrolink – making it extremely accessible by numerous transport links.

These campuses have really transformed in recent years to offer the most cutting-edge facilities and learning spaces. In fact, the renowned Advanced Technology Centre is currently undergoing a massive multi-million-pound extension to ensure it remains one of the leading technical training facilities in the country. Hopwood Hall is one of the top performing colleges in Greater Manchester, with its most recent Ofsted report finding it to be 'Good' and praising it for its strong contribution to skills-based training.

The college offers practical vocational courses including T-Levels, from entry level through to degree level, supporting students of all ages who aspire to university progression or who are looking to retrain and boost their career chances. As an approved apprenticeship provider, it offers apprenticeships in a wide variety of industry sectors that develop practical skills and expertise in real life learning environments with state-of-the-art equipment in authentic workplace settings.

Courses on offer at the Middleton Campus include Building Trades & Engineering, Business, Accounting, Travel & Tourism, Digital, IT & Computing, Health & Social Care, Science, Animal Management, Equine Care, Uniformed Public Services and Sport courses.

At the Rochdale Campus you can find Art & Design, E-Sports, Graphic Design, Games Development, Media Production, Health & Childhood Studies, ESOL, Hospitality & Catering and Hair & Beauty.

Hopwood offer **T-Levels** in:

Accounting, Finance and Legal, Team Leadership/Management, Building Services Electrical Engineering, Design, Surveying and Planning for Construction, Digital Support Services, Education and Childcare, Design and Development for Mechanical Engineering and Manufacturing, Maintenance, Installation and Repair for Engineering and Manufacturing, Supporting Adult Nursing and Laboratory Sciences.

Also, if you're not quite ready for a T-Level then we offer **transition routes** in: Accounting, Finance and Legal, Business and Administration, Construction, Digital, Education and Childcare, Engineering and Manufacturing, Health and Science.

For further information visit: hopwood.ac.uk

Apprentice

Development Program

Building great people

At Howorth, building great people is part of our business. Not only do we want to develop the next generation of engineers, we believe in developing great people too.

howorthgroup.com

Start your career with

NLTG

NORTH LANCS TRAINING GROUP

At NLTG, we have a wide range of options for you when you leave school...

APPRENTICESHIPS

NLTG Apprenticeships are full time, permanent jobs that are designed to help you learn while you earn. You will have a job, get paid from day one and gain practical skills from the workplace.

TRAINEESHIPS

Traineeships are the first steps towards an Apprenticeship. They are a high quality work experience placement with English and maths support, work preparation training and a weekly allowance.

STUDY PROGRAMME

Our Study Programme offers two exciting pre-Apprenticeship courses. They aim to help you if you are not ready, or able, to directly enter an Apprenticeship.

www.nltg.co.uk
01254 395355

APPRENTICESHIPS

Apprenticeships give you the chance to get out into the real world of work and get started in your chosen career. Our Apprenticeship courses are a brilliant way to gain new practical and professional skills, on the job training, nationally recognised qualifications and earn money at the same time. Our main Apprenticeship Sectors are:

Business Administration	Engineering	Childcare
Customer Service	HR/Recruitment	Health and Social Care

TRAINEE ACADEMY

The Trainee Academy is a Pre-Apprenticeship programme lasting between 8 and 16 weeks, which is designed to prepare you for an Apprenticeship through a combination of work and study. We currently offer Trainee Academy programmes in these sectors:

Engineering	Business Admin	Health & Social Care
Childcare	Teaching Assistant	Customer Service

FUNCTIONAL SKILLS

Our Functional Skills courses have been developed to help gain essential skills in Maths and English. As nationally recognised alternatives to GCSEs, these courses focus on developing practical and functional Maths and English skills which can be applied to everyday life both at work and at home. Courses on offer are:

- Functional Skills English Level 1
- Functional Skills Maths Level 1
- Essential Digital Skills/ICT
- Functional Skills English Level 2
- Functional Skills Maths Level 2
